

*My life feels like a MOVIE!!  
And know, just KNOW this is  
God's doing. I could never have  
planned this. I hope everyone  
reading the pages of this book,  
will pause and look at their  
own life and see the "movie"*

*that is playing, the stories that they are living. And just as in my  
story of "Tippy" my prayer is that the creator breathe a new breath  
of life into those in need of it. I Hope you enjoy my stories!!!*

This book-a collection of the most meaningful, miraculous, and  
bizarre experiences of my life-is the birth of a business I've had in my  
mind for years. It's called Five Black Women, Inc., and the concept was  
born nearly two decades ago. I was an electronic engineer at Xerox at  
the time, and I thought, Why can't there be a corporation started by  
black women like me? The white men around me were no smarter  
than I was, after all, and I thought, Five black women. That's a force  
that can make something happen.
